Science in Sync with Nature

AQUAPLEX

Proper Wetting

Reduced Watering

Root Growth

Stress Control

AQUAPLEX formula combines the benefits of AQUABOND and CYTOAUX providing a single product with the ability to reduce watering requirement, insure proper wetting throughout the soil matrix, relieve plant stress, improve plant health, and promote root growth.

AQUABOND™ is a liquefied copolymer containing a surfactant, moisture retention humectants, and propriety additives. The product has been formulated for turf, agriculture, and horticulture applications.

CYTOAUX is concentrated combination North Sea and New Zealand kelp liquid extract containing natural plant hormones. The combination of cytokinnis, auxins, and gibberllins insures an increase in cell division, cell expansion, and cell elongations. Promoting rapid root development and the expansion of root mass.

AQUAPLEX Is ideal for sprigging and sodding. Promotes quicker anchor rooting, and new plant growth with reduced irrigation.

AQUAPLEX can reduce the amount of irrigation being applied per cycle. Reducing the possibly of disease resulting from over watering.

AQUAPLEX resists leaching and continues to be effective for weeks

AQUAPLEX can be applied by boom sprayer, hose end applicator, drip irrigation, injection, fertigation or hand applied. The product is a cost-effective concentrate and must be thoroughly mixed with water to product ratio of 40:1 and agitated. Once mixed it will not separate. Follow labeled rates and instructions.

Available in 2.5 or 5 Gallon Jugs, 30 Gallon Drums, and 55 Gallon Drums and 250 Gallon Totes

AQUAPLEX is a completely earth friendly.

AQUAPLEX HAS NO APPLICATION RESTRICTIONS
