

SeaSafe™

HYDRAMAX

Drought Relief

Reduce Watering

Heat Stress Control

HYDRAMAX™ is an environmentally safe product formulated to be a cost-effective tool for water conservation. During the hot summer and especially under drought conditions it is vital to make every drop of irrigation count.

HYDRAMAX™ is coconut alkanolamide combined with a liquefied copolymer and containing non-drying humectants, and propriety additives. The product has been formulated for turf, agriculture, and horticulture applications.

HYDRAMAX™ will turn stressed discolored turf vibrant green in a matter of days!

Has the unique ability to attach, hold, and then transfer MOISTURE into plant roots. The product attaches itself to the organics surrounding the roots and to the roots themselves coating their surfaces. Provides rapid relief from drought or heat stress conditions.

The **HYDRAMAX™** particles act as tiny moisture reservoirs that attach and capture irrigation and rainfall. Also provides for better utilization of surface moisture. The product needs to be applied every 6 to 10 weeks (or as needed) for moisture management and reduced watering.

HYDRAMAX™ can reduce the amount of irrigation being applied per cycle. Thus reducing the overall amount of irrigation required to maintain healthy turf and plants. Ideal for areas under water restrictions. Insures all applied irrigation is utilized.

Dry spots and LDS on hills and undulations are corrected with one application and remain green and vibrant for weeks.

Excellent dew control on greens for tournament or everyday play.

HYDRAMAX™ resists leaching and continues to be effective for weeks. By design it will not hold excessive moisture and will allow for rapid flow through of heavy rains or excessive irrigation.

HYDRAMAX™ can be applied by sprayer, hose end applicator, drip irrigation, injection, fertigation or hand applied. The product is a cost-effective concentrate and must be thoroughly mixed with water to product ratio of 20:1 and agitated. Once mixed it will not separate. Follow labeled rates.

Available in 2.5 Gallon Jugs, 30 Gallon Drums, and 55 Gallon Drums and 250 Gallon Totes

SeaSafe's HYDRAMAX™ is a completely earth and ocean friendly.
